Jenoptik’s new microscope camera for Life Science.

Researching life is one of the daily challenges in your work and requires particularly high-quality and reliable solutions. In the field of life research, our proGRexGryphaX® series makes the ideal technical partner, allowing you to immerse yourself in your ‘micro universe’ smoothly and simply.

The new proGRexGryphaX® series provides a multi-discipline and comparatively affordable microscopic imaging tool. The comprehensive innovative design concept results in a convenient graphical user interface, a functional software workflow and an elegant camera design with state-of-the-art USB 3.0 interface.

The new proGRexGryphaX® series will become an indispensable part of your laboratory.

proGRexGryphaX® refines every microscope workstation!

Your microscope is not yet equipped with a camera? Your microscope camera needs replacing? You want to continue using your existing image analysis software?

proGRexGryphaX® provides you with an attractive solution for upgrading your workstation to a modern digital microscope station. Stay completely flexible!

Get the most from your microscope workstation!

proGRexGryphaX® cameras benefit from using optimum sensor formats for microscopy. In order to transfer the potential of your microscope to the camera, we recommend using the appropriate c-mount adapter for your system.

Your local proGRex trade partner will gladly help you to find the ideal solution for you!
25 years of ProgRes history – Made in Germany. The benefits of PROGRES GYPHAX® at a glance:

**High image quality – giving you the details to make the right decisions.**
- Professional image quality & true color know how
- Fast live image in full HD
- Sensors perfectly suited for microscopy
- Made in Germany

**Versatility – giving you the freedom to work with your favorite equipment.**
- Cross-platform compatible with WIN/MAC/LINUX
- Suitable for all microscope brands
- Brilliant ratio of technical performance and price: software and free updates already included
- Export to external software solutions possible

**Ease of use – giving your work an effortless feel.**
- User-friendly and intuitive software
- Live-image optimized – all features in real time, all the time
- Optimized workflows
- Identical GUI across all platforms (WIN/MAC/LINUX)
- Quick and easy installation
- Preset to 16:9 monitors

**Stability – giving you a reliable research tool you can count on.**
- Modern, timeless camera and software design
- USB 3.0 super speed camera interface
- Secure investment: long-lasting & reliable hardware, long-term software support & operating system compatibility

**Research Life.**
**explore**
the micro universe

**Useful PROGRES GYPHAX® software features:**
- Automatic & fast exposure control
- Live Multifocus / Z-Stacking
- Live panorama / image stitching
- Multi-Fluorescence
- Video record
- Time-lapse / image series
- Real-time histogram
- Real-time image enhancements: sharpness, noise, dynamic, colors
- Measurements with text annotations and arrow marking
- External image analysis
- Individual device configuration
- Image comparison
- Optional status bar / scale / device name
